

ACADEMY // 8.0

OFFICIALLY IN THE MICROSOFT STORE

LEARN BY DOING.

A practical cybersecurity academy built around real decisions, isolated ranges, evidence, and the discipline to explain what you found.

PRACTICAL OUTCOMES

THE TRAINING LOOP

01

BUILD THE MODEL

Understand the boundary, identity, signal, and decision before touching the exercise.

02

ENTER THE RANGE

Use disposable systems and controlled scenarios where experiments are safe to repeat.

03

MAKE THE CALL

Work through scope, reconnaissance, web security, Linux, incident response, and recovery decisions.

04

KEEP THE RECEIPTS

Capture evidence, explain the result, and leave with progress that means something.
