ONE-TIME ACCESS

A professional desktop workspace for security teams and independent operators who need defensible execution, not

7

HTTP METHODS

SHA-256

SEALED EVIDENCE

LIVE

MANAGED OUTPUT

3 PC

ACTIVATIONS

THE CONTROL PLANE

Run the engagement. Keep the evidence.

FieldOps turns approved scope into controlled execution, sealed evidence, review-ready findings, and professional reports.

WHAT FIELDOPS DELIVERS

01

SCOPE BEFORE ACTION

Bind the operator, target, ports, time window, policy, and stop conditions before execution.

02

WEB / API WORKBENCH

Compose, import, replay, and inspect HTTP requests with credential and cookie redaction.

03

MANAGED EXECUTION

Run Nmap, Nuclei, OWASP ZAP Baseline, testssl.sh, k6, and bounded resilience profiles.

04

FINDINGS TO RETEST

Promote evidence into findings, track disposition, verify remediation, and export the case.

05

PORTABLE REPORTING

Produce professional reports, signed manifests, scanner evidence, and comparative records.

06

CUSTOMER-OWNED SCALE

Use local tools and Docker on infrastructure controlled by your team.

USE ONLY WITH AUTHORIZATION

FieldOps is a professional instrument. Work only on systems you own or have explicit written authorization to assess. A license does not authorize a target.
